

Let RDG be your source for Relays

- Huge Inventory / Hard to find items
- Exceptional value
- Meets safety updates
- Finest quality

Relay Remanufacturing

Rail Development Group has one of the largest remanufacturing facilities for relays in the Northeast. Our inventory of relays cores is in excess of 5000 units. This allows RDG to fill orders for both high volume items, as well as one-off hard to find relays. All RDG remanufactured relays are assembled and adjusted to OEM specification including all safety updates and RDG backs every relay we ship with our industry leading 5-year warranty.

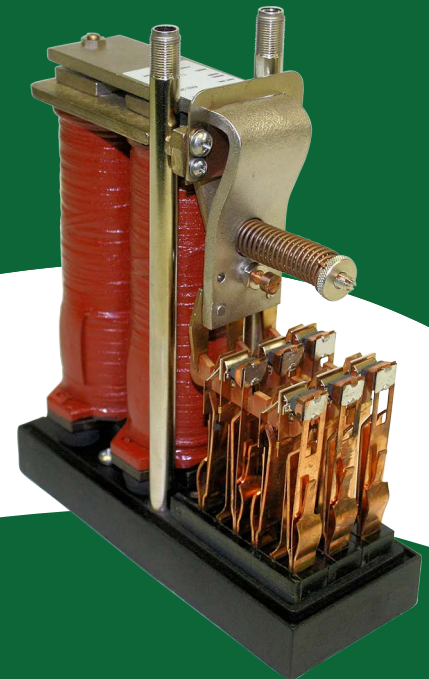

Rail Development Group can remanufacture relays from the following OEMs:

- Alstom (GRS)
- US&S
- Safetran
- Transcontrol
