

RX FN Flasher Assembly

Ordering Information

14054-100 RX FN Only

14054-200 RX FN Flasher Assembly with Flasher Relay

The RX FN flasher assembly allows you to quickly and easily change out your old worn and obsolete FN-16 or FN-16A relays without any design or wiring changes.

By leveraging current and proven B1 relay technology the RX FN flasher assembly eliminates the cost and long lead time to repair or replace outdated shelf style relays.

Units can be purchased with or without a B1 flasher relay and are wired terminal for terminal into your existing circuit; exactly the same as an FN-16 or FN-16A relay.

Features / Benefits

- REPLACES FN16/16A
